# How to Steps Set up Email account in Gmail with POP3

In this guide we show you how you can set up your email account in Gmail with POP3.

Before you continue, we want to make you aware of the following limitations Gmail only allows you to set up your email with POP and not IMAP. This means that your email only gets downloaded, it doesn't get synced back to the server.

Gmail only downloads emails from your Inbox. Emails in other folders, like Send and Drafts are not downloaded.

By default, Gmail downloads the emails and then removes them from the server. We recommend that you check the option to leave a copy of the email on the server. That way you can still access your emails in Webmail.

#### Step 1 - Log in to Gmail and go to Settings

- 1. Log in to your Gmail account.
- 2. Click the gear icon in the top right corner.
- 3. Select Settings from the drop-down menu.

## Step 4 - Confirm you want to import with POP

For some accounts it's possible to link an account to a service called Gmailify. This is not possible for your email account hosted with TillTech.

Select "Import emails from my other...".

Click Next.

#### **Step 5 - Enter the POP server settings**

Please use the following settings for the incoming email:

- Username: your email address
- Password: the password you use to log in to Webmail
- POP server: mail.enterthewifi.com
- Port: 995
- Check the option to leave a copy on the server (Recommended).
- Check the option the use SSL.

Click Add account to continue.

Tip: We recommend you to check the option to leave a copy of your emails on the server. That way you can still access your emails in Webmail.

## Step 6 - Confirm you want to send from Gmail

You can now receive emails from your email account in Gmail. The next step is to set up the outgoing settings, so that you can also send emails from your account.

- 1. Select "Yes, I want to be able to send..."
- 2. Click Next.

## Step 9 - Open the Gmail Confirmation email

Gmail will now send you an email with a confirmation code.

- 1. Log in to Webmail.
- 2. Open the email "Gmail Confirmation Send mail as..."
- 3. Copy the confirmation code in the email.

#### Step 10 - Enter the verification code

Paste the verification code in the field and click Verify.

Step 11 - Verify your settings

Your account is now set up. You can both send and receive email in Gmail. Check your settings to make sure it's set up according to your preferences.
